

Dani's Pedigree Information

Oh, Dani Girl is owned by Laura Schmieder, currently residing in Rapid City, South Dakota. Laura bought Dani in 2017 from a family friend's litter when she lost her chocolate. She knew without a shadow of a doubt that her next pup was coming from her friend's dogs. Laura's friends owned both Dani's parents and grandparents and Laura had the opportunity to observe these dogs for years and was so impressed with them and the pups they produced she jumped on the chance to own a pup from them.

Dani is a gem of a dog and was by Laura's side continuously for the first two years of recovery after her car accident in 2018. Dani is equal parts playful, cuddly, and is extremely intuitive and likes to communicate with her human using her eyes. She's great with kids, other dogs and loves adventures.

When Laura started traveling to see different specialists around the country following her accident, Dani was public-access trained and went with her everywhere. Dani was a huge support during that time and was incredible at anticipating Laura's needs. She is currently being task-trained as a migraine alert dog and is excelling in that capacity.

Dani has produced very intuitive pups and a phenomenal hunter came out of her last litter.

Dani is not currently registered as her grandfather's papers were misplaced during a move and copies of the papers were never acquired. Laura is currently attempting to track down the breeder that her grandfather was purchased from in order to get the needed paperwork to get her registered. Dani has been DNA tested and is 100% purebred, she has also been microchipped and OFA tested for hips and elbows.
